Vee-Rock™ Retaining Wall Solution

Vee-Rock™ walling range

Our Vee-Rock™ block system is an engineered retaining wall solution.

The Vee-Rock™ free-standing modular interlocking block system has a rock faced/ natural finish, which provides a pleasing finish to any retaining wall structure.

It can be used in a huge variety of settings, including railway embankment creation, stabilisation and remediation, landscape gardening/housing developments, roadsides, commercial/industrial and flood plain protection.

One of the key features is the speed of construction (up to 70m² per day) which combined with the natural look makes this solution an extremely valuable alternative to traditional retaining walls or gabion baskets.

Cast from high strength 50N/mm² concrete, these blocks are extremely robust and durable with a design life of 120 years.

Block Type	L x W x H mm	Weight
Standard Block	1220 x 585 x 610	970kg
Half Block	610 x 585 x 610	485kg
Top Block	1220 x 585 x 610	795kg
Half Top Block	610 x 585 x 610	400kg
Corner Block	1220 x 585 x 610	915kg
Top Corner Block	1220 x 610 x 585	775kg
